1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 to 23 are rejected under 35 U.S.C. 102(anticipated) as being anticipated by Inanaga.

Inanaga discloses an apparatus for processing an audio signal comprising: means for synthesizing a plurality of M sound sources signals (multichannel analog stereophonic signal source 2 of fig. 1) to provide N sound source signals (output of 21 and 22), the number N being smaller than the number M of the sound source signals, based on at least one of position information, movement information and localization information of the M sound source signals (38, 64, 31, 32, 33 and 44); means for generating synthesized information by synthesizing information corresponding to the synthesized N sound source signals from the information of the M sound source signals (5, 8, 10 and 12; and signal processing means for localizing in sound image the synthesized N sound source signals based on the synthesized information from the means for generating (5, 7, 9, 11, 15 and 16); ; the localizing in sound image in the signal processing means is virtual sound image localization for obtaining two channel reproduced signals supplied to a pair of acoustic transducers to localize a sound image at an arbitrary position around a listener (col. 16, lines 26 to 40); at least one information of position
